

Using the V-Series panel's ethernet RJ45 jack connected to a wireless internet adapter the user can set up a wireless panel connection when the IVC-32 card on the Eclipse frame is connected to a wireless router.

Wireless Router

Netgear WNCE 2001 Wireless Internet Adapter

Eclipse Frame

V-Series rear panel

V-Series front panel

Using the V-Panel's Local Menu setup the ethernet port properties:
IP SETUP → NET SETUP → DHCP set to "Disabled", then setup the remaining properties:

IP Address:
IP Gateway:
Login IP:
Login Port:
Subnet Mask:
Con Type:

Standard CAT-5 Cable
