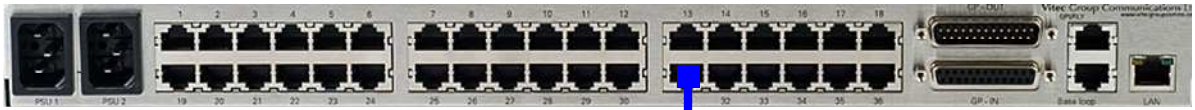
## Main Studio



Pico Frame Ports

Voice 2 Interface Client

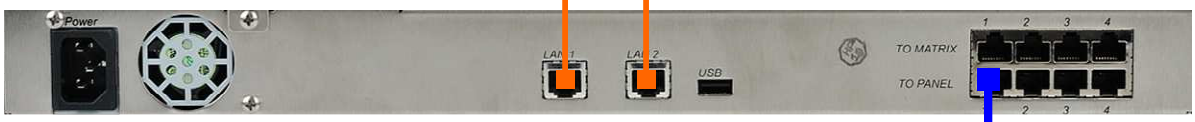
ECS software & Internet connection to Voice 2 server and client

Ethernet

**Ethernet connections**

**CAT-5 connections**

## Remote Studio



Voice 2 Interface Server

V-Series panel (rear)

V-Series panel (front)

Connect the Eclipse frame panel port to the Voice 2 “To Matrix” port. Connect the V-Series panel “Matrix Comms” RJ-45 connector to the Voice 2 interface “To Panel” port. Both Voice 2 units need to have ethernet connectivity to each other (one Voice unit is the Server, the other is configured as the Client. Using the LAN 2 connectors access the Voice 2 software GUI to program the port properties. When properly configured the V-series panel will connect to the “remote” Eclipse frame.
